

AVANCER

Double turret compact slitter with an integrated unwinding station

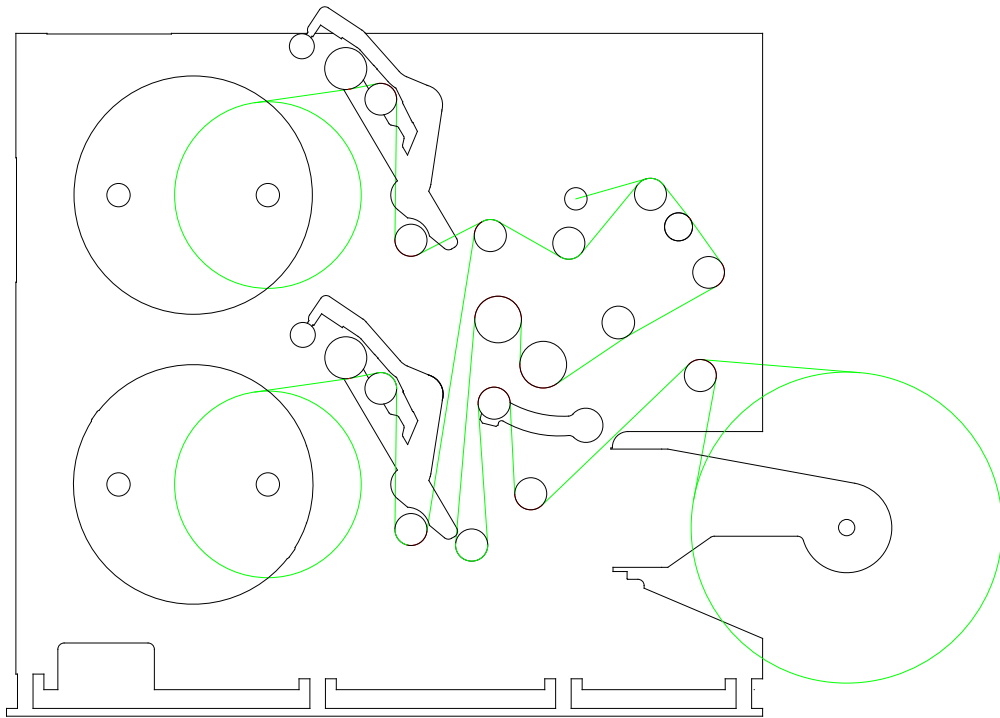

High performance machines for slitting and rewinding flexible materials

- Turret rewind
- Automatic knife setting
- Precise tension control
- Various handling solutions
- High automation
- Advanced software solutions
- Controlling possibilities
- Intuitive Control Panel

Web width	1000/1600mm	Unwind roll diameter	1000mm
Min. web width	300mm	Unwind roll weight	1500kg
Min. slit width	50mm/25mm option	Rewind roll diameter	600mm
Speed	650m/min	Core roll diameter	70mm, 3", 6"

Processed materials: printed / unprinted foils (PE, PP, PA, PS, PET and other), paper, metalised films, laminates, labelstock films, alu films

AVANCER is an automatic double turret slitter with four rewinding shafts and an integrated unwind station designed for increased productivity and low production downtime. The combination of local engineering and high class German components has resulted in outstanding solutions. The slitter is built accordingly to traditional Jurmet solid and robust construction standards. Numerous proven solutions applied in AVANCER slitter are designed to ease operational and maintenance high degree of flexibility.

AVAILABLE EQUIPMENT:

- 4 x rewinding shafts
- Integrated unwinding station
- Supported shaftless unwind
- Eco-friendly built, incl. reduction of overall energy consumption
- Parent roll lifting
- Pneumatic splicing table to join the material behind unwind station
- Web guiding system BST CLS Pro 600
- Automatic setting of rotary knives or razor blades
- Touch screen panel with memory
- Inbuilt trim vacuum system
- Automatic laser core positioning system
- Automatic pushing bar
- Automatic handling to unload finished reels
